2012 Hawaii Pacific GIS Conference March 5-7, 2012

The Hawaii Geographic Information Coordinating Council (HIGICC) and the Hawaii Statewide GIS Program in the State Office of Planning are joining together to host the 2012 Hawaii Pacific GIS Conference based on the theme "Geospatial, It's Everywhere." **The conference will be held at the Hawaii Convention Center from March 5th thru March 7th, 2012.** Similar conferences in the recent years have attracted 300 to 400 attendees from Hawaii and the Pacific Basin. Attendees included professionals from the planning, geospatial, and engineering disciplines across federal, state, county, military, education, and private sectors.

We invite you to join us at the 2012 conference as a sponsor and/or exhibitor. Your participation is critical to the self-sustainability of the conference, and helps ensure that HIGICC continues to bring together professionals from the regions' geospatial community. The conference provides continuing education and networking opportunities to its members and the wider community. The exhibition room is one of the most lively and well attended venues at our conference and we hope that your company will be able to participate at some level. It is our goal that participating in the conference is a worthwhile endeavor and has benefits beyond the name recognition and marketing opportunities it will offer to you.

Please feel free to contact Craig Clouet at conference@higicc.org if you have any questions about sponsorship.
