Green Stormwater Infrastructure SUMMIT

Café Julia
1040 Richards Street | Honolulu, HI

This event is supported by an award from the National Sea Grant Office received by the University of Hawai'i Sea Grant College Program.

Additional support has been provided by the Hawai'i Community Foundation and AECOM.

HAWAII COMMUNITY FOUNDATION
Amplify the Power of Giving

Keynote Speaker

Howard Neukrug, PE, BCEE, Hon. D.Wre

Former Commissioner and CEO, Philadelphia Water Department; Senior Fellow, US Water Alliance; Fellow, Penn Institute for Urban Research

Philadelphia's **Green City, Clean Waters** continues to be one of the most comprehensively green approaches to long-term water quality and quantity management that also demonstrates the benefits to community, urban livability, and connection to place.

Hear about how municipal leadership, governance and economic tools have transformed transportation projects, park improvements, and neighborhoods for a more sustainable and growing economy, where stormwater infrastructure has become a "triple bottom line" investment.

Topics to be Covered

- Whole water systems thinking and island imperatives
- Green stormwater infrastructure and green communities
- Emerging tools and methods for watershed management and community-scale green infrastructure
- Collaboration and partnerships for installation and asset management
- Local project highlights and stories from the field
- Putting research to work and extending from the university

CE Credits to be Pursued
